

California Restaurant Owners
Subject- Recently Outlawed Garbage Disposals

Enclosed Please find information on our Drain Net products. We manufacture products designed to eliminate clogged drains and the problems associated with them. California has recently outlawed the use of garbage disposals in an effort to reduce the solids that are discharged into the water treatment facilities.

The solution is simple, purchase a flat strainer which is a direct replacement for any garbage disposal. The flat strainer will allow you to easily capture the waste from your sinks. To empty the unit, simply remove the strainer drawer and dump in the garbage.

Please visit our website www.drain-net.com to see a demo. We have floor drains and floor sink baskets that should also be used throughout your restaurant. Our products offer simple solutions to a very expensive and never ending problem for a restaurant owner.

Please do not hesitate to contact me if you would like to know more about how we can permanently solve your drain problems and keep you in compliance with all of the ever changing laws effecting restaurant owners. Our toll free number is 1-800-407-3726.

Sincerely,

John Matonis
President of Drain Net
